

AI Quiz Generator

Description

The AI Quiz Generator is a tool that leverages artificial intelligence to automatically generate quizzes on computer science. It uses natural language processing (NLP) and API to create challenging and diverse questions for users.

Table of Contents

- [Installation](#installation)
- [Usage](#usage)
- [Contributing](#contributing)

Installation

To install the AI Quiz Generator, follow these steps:

1. Clone the repository.

```
git clone [repository-url]  
cd ai-quiz-generator
```

Usage :- To generate a quiz , run the following command.

npm run generate-quiz

Follow the prompts to specify the quiz topic, difficulty level, and other parameters. The AI Quiz Generator will then create a set of questions for your quiz.

Acknowledgments :- Special thanks to Hriday Sanker , Lekhika Mishra and Shivani Lohiya who have help improve the AI Quiz Generator.
